Re: CG 02-278

To whom it may concern; the website provided for comments is linked incorrectly to ECFS not FCC and will not allow submission of our email comment. Please forward this to the appropriate location. Thank you.

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. The Indiana law has made our life in our home much better. It has virtually eliminated unwanted telemarketing phone calls (anywhere from 7-21 weekly). The Indiana law has reduced unnecessary trips to the telephone and stress from anger arising from these unwanted telephone calls.

We believe the FCC should model the Federal Proposal after the Indiana law

Thank you,
Sincerely, John and Carole Brigham
